To See the Great Don Carlos Trained Animal Circus

The 2 weeks' engagement terminates **SUNDAY NIGHT**. Do not miss this great show. No child should miss seeing the trained dogs, monkeys and ponies each night at 8:30.

Matinee Saturday at 3 P. M., 10c

Heat Is Quick to Affect the Bowels

Well-Known Fact That Extreme Heat Conduces to Chronic Constipation.

So many people are in the habit of eating cold food in hot weather that constipation is very common during summer. It is best to vary the food and have some hot things, as, for example, soups and hot fish and meats. If that is to be the diet, food water should be drunk sparingly.

In spite of all care people will become constipated, and if you find yourself in that condition you can get immediate relief by the use of Dr. Caldwell's Syrup Pepsin. There is no time of the year when you should be more careful of constipation than in the summer, for many of the serious illnesses as well as the fatalities result from a clogging up of the bowels. You also need general good health to withstand the heat, and hence Syrup Pepsin is best to take because it contains tonic ingredients that help to build up the entire system.

Numerous users throughout the land will verify these facts, among them, Mr. George C. Allen, 408 N. Main St., Reading, Mass., who recovered his health completely after using only two bottles, and Miss Anna Schott, 249 S. Washington St., Baltimore, Md., who uses it for constipation and now has

her mother and friends also using it. They now avoid drastic remedies like cathartics, tablets, purgatives, salt water, pills and such things. Dr. Caldwell's Syrup Pepsin is mild and pleasant, and children like it. You can obtain it of any druggist at fifty cents and one dollar a large bottle. Each bottle must be what is claimed or your money will be refunded.

Families wishing to try a free sample bottle can obtain it, postpaid, by addressing: Dr. W. B. Caldwell, 415 Washington St., Monticello, Ill.

Keystona

Means a flat wall finish that is similar to kalsomine, except that it is much more durable, and can be washed with soap and water. We carry several beautiful shades. Price \$2.00 per gallon.

MINING NEWS DECREASE IN COPPER MINING ACTIVITY

Calumet & Arizona Has Ore Sufficient to Run New Douglas Smelter.

Meabe, Ariz., June 21.—Mining men here regard as eminently satisfactory the decrease of more than 8,000,000 pounds in the surplus copper during May and a commensurate decrease indicated for the first half of the present month. For weeks now the price of metal has been steady, with a gradual increase and the present price of 15-12 or better has shown the direct bearing here in the number of new claims opened up and the increased development and surplus of the gold companies. The decrease is so large that it is sure that this factor alone will have a considerable bearing on the continued steady price of copper and the demand for the metal is growing all the time.

Abundant Ore for Smelter.
The extensive and valuable holdings of the Calumet and Arizona have been drawn attention to by the opening of the new smelter at Douglas and show that, without any doubt, the company can supply the smelter with all that it can use for years to come. The Calumet and Arizona holdings are a mile and a half long and a mile wide and are underlain by bodies hundreds of feet in length and running up to 20 feet in breadth. This has been carried up nearly 50 feet and there is a good chance of picking it up on the level below. The largest body of high grade copper is in existence. It is a great open stop more than 400 feet in length and in some places 40 feet wide. It is mined by the direct shaft, and the company is not over 75 cents per ton. This exceptional low cost of production of a high grade ore is probably the lowest in the country.

At the present time the ore is being hoisted through three shafts, the Hoatson and Oliver, the first named furnishing around 250 tons daily, the Hoatson about 450 and the Oliver about 700. Through the latter is pumped the ore from the level and the Cole shaft. When the extensive concreting work at the junction, which is progressing favorably, is completed, it will be the principal ore shaft.

Holds Record for Depth.
The junction holds the record for depth on the Calumet and Arizona property, having been sunk 1500 feet in the level of the level. On account of the concreting, no development work has yet been undertaken on the level.

The high grade oxides in the mine have been nearly exhausted, but have been more than replaced by great bodies of high grade ore. The ore is mostly in the Superior and Pittsburg property, which is owned by the Calumet and Arizona. There is great difficulty in sinking the junction, one shaft being sunk against a head of 2500 gallons per minute, or equal to 1,000,000 gallons per day. The cost and expense have, however, been more than justified by the results, as it was the development of the sulphide ore that made it possible to build the new smelter. That the smelter will be supplied for years to come is amply shown by the wonderful richness of the ore.

Charles Holquist, inventor of the Cochise rock drill, has been in the city since Los Angeles looking over the general situation here. Mr. Holquist has a large number of his drills at work in the Calumet and Arizona mine. He here he signed a contract with the Shattuck and Arizona to put in a number of the drills, which have been found to be particularly applicable to the class of rock found in the district.

GETS GOOD RETURNS FROM ORE SHIPMENT

Los Angeles People Buy Three Mining Claims in the Catalina Mountains from Winkelman Men.

Winkelman, Ariz., June 21.—Auton Hognal, a prospector in this district, shipped nine and one-half tons of ore from his claims near Winkelman, with his receipts show a return of five ounces of gold and one ounce silver. After smelter charges were paid, a net return of \$1,000 was given. This property has made several shipments the last year and each shipment has shown an increase in value. The property lies between the Arizona Eastern main line from Phoenix and what is known as the Phoenix mine, 10 miles north from Winkelman. Supplies for further development have been sent out to the property immediately.

Further specimens from the Reider-Kutik claims in Ash creek have been brought in and a small shipment will be made very soon from this property. It is now given out that this "pay streak" on this property is 18 inches with good copper ore on "hanging wall" making the pay ore show about 27 inches. This includes copper and gold.

RECORD SHAFT WORK IN EXTENSION MINE

Pearce, Ariz., June 21.—The record shaft work for this locality has been established at the Commonwealth Extension Mining company property, where superintendent R. L. Stalling cut down a double company shaft 206 feet in 20 days, and timbered in full 194 feet of the 206 feet. The company has been at work only 20 days under the present management and has made a remarkable showing. The company now has three shafts, one of 18 feet, one 206 and one now going down which is now over 220 feet deep, and all three show ore. The shaft will be sunk to water level and once and some time about the middle of July will see that end accomplished. Then drifting will be pushed to cross cut the entire hill just above the water level. Parker Woodman will arrive from Phoenix shortly to remain here some time.

Work of installing the mill at the old Commonwealth is going on in a satisfactory manner.

The Time To Save Your Hair Is Now

Newbro's Herpicide is the one remedy on your druggist's shelves which may always be depended upon. Instead of complaining to your friends and mourning over your loss of hair, call upon your local druggist and purchase a bottle of Newbro's Herpicide.

It is the first and original remedy, guaranteed to kill itching scalp, itching and check falling hair.

You can save the hair you have much easier than you can grow new. The time to save your hair is now. The remedy for doing it is Newbro's Herpicide.

The same opportunity never comes but once.

Applications at pool barber shops.

Send in postage for sample and booklet to The Herpicide Co., Dept. R., Detroit, Mich. Applications may be obtained at good barber shops. Kelly & Polard, Special Agents—Advertisement.

MINING NEWS EXPECTS INSPECTOR TO VOID DISASTERS

Arizona Copper Company at Clifton Appoints Frank Farmer to Safe-guard Mine Against Accidents.

Clifton, Ariz., June 21.—On the theory that direct instruction and advice by a man on the ground, familiar with all underground workings, is the best safeguard against accidents, the Arizona Copper company has created the position of local inspector at its mines and works. The position is being filled by Frank Farmer, formerly connected with the mining bureau of the interior department and later, in charge of several Mexican properties.

Already Mr. Farmer has familiarized himself with the underground workings of the company's mines at Morenci, Metcalf and Coronado, and he is collecting a mass of statistical data which, after a series of observation and comparison, will determine the factors that tend toward increasing or decreasing the number of accidents. These are carefully and thoroughly investigated by him and he has made numerous valuable suggestions to superintendents Norman Carmichael and Mr. Farmer's instructions are to cooperate in every way possible with the state mine inspector and his deputies. He is thoroughly familiar with the state mine inspection law.

Recently the Arizona Copper company purchased apparatus for rescuers men who are overcome by gas or smoke. Other mining companies in southern Arizona have recently taken steps looking toward additional safety for their underground workers. In some places safety committees have been appointed and regular meetings are held for the discussion and adoption of rules governing underground work.

AMPLE CAPITAL FOR THE YUMA-WARRIOR

Operations to Be Resumed in Midnight Test Mine in the Groom Creek Mining District.

Prescott, Ariz., June 21.—Ample capital has been provided for the development of the property of the Yuma-Warrior Mining company, which is better known as the old Harqua Hala mine. In the early days this was one of the most important gold producers of the west, monthly shipments of bullion running as high as \$200,000. A record of \$5,000,000 in dividends, and much gold was taken out by thieves.

Much rich ore has been dropped in the Harqua Hala since it dropped out of the list of producers. The present company has erected a plant on the property. It is now stated that the plant will be in operation within 60 days.

Operations are to be resumed on the Midnight Test mine, in the Groom Creek district. Col. K. D. Chase, one of the principal owners, is coming from Phoenix, Minn., to take charge. The Midnight Test has a main working shaft of 400 feet in depth and much ore has been blocked out. A 18 stamp mill, hoisting plant and other appliances are on the ground, with accommodations for a larger number of miners.

Owing to warm weather, operations at several properties in the Tipton district have been suspended for the summer. The principal camp that is maintained is that of the Inspiration Mining company, which is keeping a 18 stamp mill running steadily. A new plant of the same capacity is being installed.

REBELS ARREST 12 SONORA HIGHGRADERS

State Government Shows Disposition to Protect Properties from Mexican Mine Thieves.

Douglas, Ariz., June 21.—That the rebel government of Sonora is willing to make restitution in some instances, as well as take from the wealthier classes a portion of their wealth, is shown by the recent arrest and imprisonment of 12 high graders who had been working the Antigua mine of Frank M. Watts of this city.

The property is located in the Tatabacoqui district near Oputo. Rebels, who are now in control of the high graders had opened up a considerable body of ore from which they were extracting rock running better than 150, that being the price paid by an ore buyer for some of it. He complained to the local junta of the "constitutionalists" which sent a short message to governor Pesquera. A reply was received on the following day stating that the committee at Morenci had been instructed to give ample protection to the property. On the day following a message was received from the president of Oputo saying that he had received the instructions and arrested 12 men, who are being held in prison awaiting the disposition of the government.

AUTO FOR HIRE. PHONE 1.—Advertisement.

DISMISSES AUTOISTS BUT GIVES WARNING

Autos Must Be Left Standing Within Nine Inches of and Parallel With Sidewalk.

Automobiles must be left standing within nine inches and parallel with the sidewalk curbing, according to acting corporation court judge J. I. Hewitt. This rule, he stated, he intended to rigidly enforce, stating that the manner in which owners left their cars on the streets must be stopped by arrests or fines.

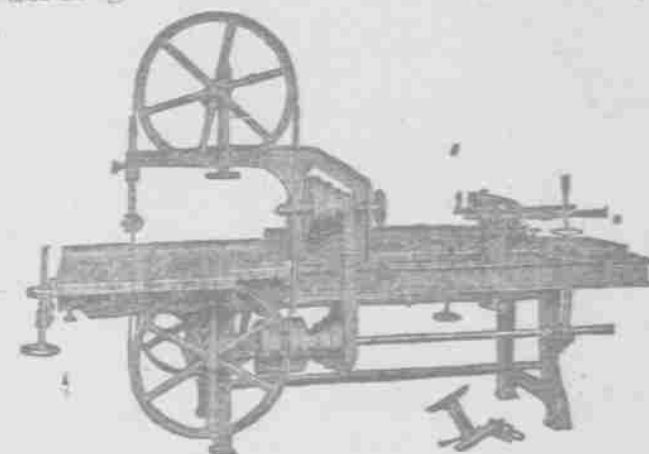

The cases against R. A. Remey, G. T. Newman, W. J. Rand, George R. Bacon and Charles Kinkel, who were arrested Thursday afternoon on a charge of blocking traffic by leaving their automobiles standing at the American National bank building on Oregon street were dismissed. Afternoon Hewitt, warned them that the next time they were brought before him they would be fined. Mr. Rand suggested that the matter of parking automobiles on the city's streets would be taken up by the automobile club with the view of arriving at some definite mode, or rule for the owners of cars to be guided by.

F. W. Derkschire, in charge of the immigration department on the Mexican border, has returned from the east, where he has been on official business.
